AZIZ LOKHANDWALA

SENIOR UNITY DEVELOPER | UNITY | C# | GAME DEVELOPMENT

+917338458214 azizlokhandwala12@gmail.com Mumbai, India

PROFESSIONAL PROFILE

Senior Unity Developer with **8+ years of experience** building mobile games, multiplayer systems, and live-service experiences across puzzle, racing, sports, and RPG genres. Skilled in **gameplay architecture, third-party and backend integrations, and technical leadership.** Known for building scalable systems, mentoring teams, and turning complex technical challenges into polished, business-ready game experiences.

WORK EXPERIENCE

Senior Unity Developer

3MG Production | Aug 2023 - Nov 2025

- Developed gameplay systems and prototypes for multiple publishers including Sunday Games and Voodoo.
- Contributed to projects spanning racing, puzzle, RPG, and casual game genres.
- Rapidly built and iterated prototypes to validate gameplay concepts and publishing opportunities.
- Worked directly with multiple publisher teams and external developers, adapting to different production pipelines and review processes.
- Delivered gameplay features, systems architecture, and technical solutions across multiple projects simultaneously.
- Built a racing game using Splines and AI opponents capable of reacting to the player and obstacles on the track.

Lead Unity Developer

All Star Games | Apr 2021 – Jul 2023

- Led development efforts for Zen Puzzle and Triple Match 3D.
- Coordinated development priorities, sprint planning, and technical execution across the team.
- Identified and removed development roadblocks to maintain project momentum.
- Provided technical leadership and mentorship while assisting developers in solving complex engineering challenges.
- Developed core gameplay systems for ASC2, a multiplayer 3D game.
- Integrated multiplayer networking solutions and implemented lag compensation buffer systems.
- Designed scalable framework architecture supporting long-term project growth.
- Built reusable notification and service frameworks around third-party modules.
- Collaborated on gameplay mechanics, networking systems, and backend integrations.
- Integrated Photon multiplayer system with input caching to eliminate latency.

WORK EXPERIENCE

Senior Unity Developer

Cosi Games | Nov 2016 - Apr 2021

- Developed and launched a 3D basketball prototype that progressed into full production.
- Led onboarding and technical training for newly hired developers.
- Transitioned live backend functionality to PlayFab after the existing backend provider was discontinued.
- Integrated third-party solutions for analytics, advertising, and crash reporting.
- Contributed to gameplay systems, live operations, and production support throughout development.
- Owned development and delivery of major gameplay features from concept through release.
- Developed a friends system utilizing proprietary backend services.
- Created a training mode focused on player skill development and progression.
- Implemented arena selection systems and multiplayer matchmaking functionality.
- Built character customization and locker room systems supporting 100+ cosmetic items.
- Collaborated with designers and backend developers to deliver engaging multiplayer experiences.

CORE SKILLS

- **Unity**
- **C#**
- **Addressables**
- **Multiplayer Systems**
- **Version Control (Git, Bitbucket, Sourcetree)**
- **Gameplay Programming**
- **Mobile Game Development**
- **UI Development**
- **Third-Party Integrations**
- **Technical Leadership**
- **Firebase remote config and A/B testing**
- **Analytics Integration**
- **Advertisement Integration**
- **Live Service Development**
